

CRC TiME Forum Speaker Biography – Vivek Srinivasan

Vivek Srinivasan is an Associate Director in CSIRO Futures, the strategic and economic advisory arm of Australia's national science agency. He specialises in complex national and industry challenges and the role that science and technology can play in addressing them. He led the development of CSIRO's Mining Equipment, Technology and Services (METS) Industry Roadmap, has analysed innovation in the energy and mineral resources industry and led the exploration of solutions to support low impact mining. Vivek has also led tailored analysis, disruptive scenarios, technology scans and techno-economic modelling for government and industry customers. He most recently led the development of CSIRO's CO₂ Utilisation Roadmap exploring how carbon dioxide could be used for commercial applications to support emissions reductions and industry growth.
